## **Introduction**

In 2008, I began my own personal awakening and ascension journey. That awakening journey has changed every aspect of my life: physical, emotional, mental and spiritual. It has led to my ability to see the full scope of what is happening on our planet, sometimes years in advance, and understand how the human experience has the potential to be joyful beyond our wildest imagination.

My own evolution, from growing up in an extremely fundamentalist religion to becoming an atheist to eventually discovering my own spiritual path, has allowed me to view this amazing time in our human experience from an expanded perspective that few others have. In the pages that follow, I share my understanding of our collective past and present, along with insights about moving forward as we work together to move out of a reality based in fear, control and scarcity and into a reality based in love, freedom and prosperity for all.

I've also included terms and phrases I have found helpful in my own awakening process as well as what I've been seeing in the collective process. Hopefully, the information I share here will give you an increased awareness of where we are heading and why it's such an exciting and important time to be alive.

## **What is The Great Awakening?**

The Great Awakening is a time foretold across every culture and system of belief. It has been prophesied by many mystics, prophets and visionaries. It has been long awaited by billions of people over thousands of years, each simultaneously hoping and fearing that the great unfoldment would take place during their lifetime.

This age marks the end of the known world, when darkness breaks loose from the human story and light prevails. It is the time when all truths are revealed, secrets can no longer be kept, and deception is exposed. It is the time when all corruption is unveiled; the curtain is pulled away so humanity can see what was not visible before. It is the time when one season concludes, and a new season of humankind begins. It is a time when the entire hidden story is told, and people can no longer deny where they have been led astray. It is illuminating the deception and control that has been hidden in plain sight for eons, while also revealing the hidden successes and wins, as they did not fit into the fear-based agenda of the past. This time is when all systems are crumbling in order for new systems to be built.

This Great Awakening is the great dawning of a new day for humanity as we begin to see our true potential in the light and love of God, in His/Her/Its many names, in all things. It is waking up to the truth of creation. It is bringing up our collective suffering to be healed. It is the breakdown of all things that leads to the greatest breakthrough humanity has ever seen.

Throughout the human story, since the beginning of known history, we have experienced many mini-awakenings and ages of enlightenment. When times get too dark, people begin to awake, rise up and rebalance the playing field as much as they know how. There have always been minds open enough to lead the way and guide the people in their uprising. Awakenings and ages of enlightenment are always based upon the quest for peace and freedom.

Never before, however, has there been an awakening to this degree. The entire planet, citizens of all countries, now living, experiencing life and communicating all together as one humanity— no longer weeks, days, months, or years apart. We are all present, all experiencing the same awakening at the same time, in this now moment. While preceding empires have come and gone, never before has the whole world been ruled by one group of people; never before have all the masses they overrule assembled together to topple them.

This is where we presently stand. We are on the precipice of creating an entirely new reality for all life on Earth as human beings work together to take back our planet from the control of greed and fear.

This is the Great Awakening—a global awareness of the fear, greed and corruption that has spread darkness like cancer across the entire planet and through all of our systems. At the same time, this is the Great Enlightenment, when all people are learning how to see a bigger picture and bring more light into every facet of life.

This has been a long, dark night for the soul of humanity. Having lost our way in the darkness, we now need to look at our collective painful past and all of our fear-based beliefs while everything we've thought was real collapses around us. The death of the old ways can be

terrifying for those who cannot see what is on the other side. Right now, we are in the breakdown that always occurs before the breakthrough; the dark before the dawn. Trust that we will awaken into something deeper, something more real and meaningful than we've ever experienced before. We will find a collective resolve to create an entirely new world. Now that we know better, we can do better.

I lovingly refer to this process as the "Collective Holy-Shift," when people are drawn in and connected to their spiritual nature and all-loving truth. This Holy-Shift is a transitional period for all beings and for the planet herself. The global breakdown occurring now may be painful and messy, yet it is necessary for us to realize our divine potential. Transitions are never easy, but the euphoria and beauty that results are often beyond words. When we collectively emerge from darkness, it will be a whole new world. This unified Holy-Shift will lead to heaven on Earth.

We are awakening to a whole new purpose for being. As the darkness fades away into the night, we emerge into the light of living love. It is the dawning of an entirely new creation. We are in the shakeup part of the wakeup. The Holy Shift, the shitstorm, the circus, the show, the rickety roller-coaster, the dark tunnel, the cocoon, the breakdown before the breakthrough, the apocalypse—whatever metaphor we choose to call it, this part of our collective transformation feels like all Hell breaking loose. It is bringing everything up to the surface for us to get a good, long, hard look and decide what we want to do with it. We can't move into the new way of being until we resolve our collective issues and clean up our collective clutter.

Yes, WE—because nothing happens on our planet without our consent, even when the consent is unconscious. And WE are now working together to consciously create a new reality.

## Why a Spiritual Revolution?

By its very nature, the dark side has no long-term vision because it cannot see in the dark. It has continued to play the same game plans routinely throughout the long human story, and we have finally started to wise up. History repeating itself serves the purpose of learning from those dark lessons (mistakes) so we don't replicate them over and over. However, until we learn those lessons, rather than simply bandaging and hiding our collective suffering, we are destined to repeat them. The darkness has taken over almost the entire Earth playing field. The way to defeat the dark side and bring more light into our collective experience is to stop pretending the suffering doesn't exist or refuse to look at it. We need to remove the bandages and quick fixes that hide the suffering caused by our past mistakes, shine a light into the darkness, look at all of the unpleasantness, learn the lessons and then restore the balance of light and dark. Then hopefully, if all goes well, we will each move into greater light with only shadows behind us to remind us where we have been and how far we have come.

All revolutions and uprisings have been spiritual revolutions at their core. Revolutions occur when those who have been oppressed are no longer willing to tolerate oppression. The human heart, the human spirit, cannot be squelched—it can only be repressed for so long before it yearns to break free. Humanity's current oppression has only lasted this long because control and domination have been painted as safety and security. But now, too many have woken up, seen how they've been played and refuse to continue as pawns in the dark game.

This awakening and awareness of the dark game, recognizing how we've been played by deception and control, is a call for a new kind of revolution. Collectively, as one humanity, we are taking back our planet and demanding the freedom that is rightfully ours. Movements all over the world have been rising up, digging in, and pushing forward, such as the Occupy Movement, Arab Spring, #MeToo, Black Lives Matter, V-Day, Rise Up for Children, QAnon, and many others. More and more people's voices are being heard as we eradicate the barriers created to keep humanity small, contained and divided.

All humans yearn to be free; free to create, to love, to be happy and to simply be. Freedom is a God-given human right. When that is confiscated by those who deem themselves in power, the yearning for freedom wells up in the human heart and begins to rise. Each uprising is fueled by a spiritual movement even when it does not look that way on the surface. Revolutions cause breakdowns. With every breakdown comes new spiritual understanding and breakthroughs that lead to new worlds.

At the surface, revolution looks like a revolt against the status quo and chaos, as the existing order is no longer tolerable to those who are rising up. From a spiritual perspective, revolution is another turn, a step up the spiritual spiral of understanding. It is an evolution of the soul. The word "revolution" has been misinterpreted to mean *revolting against*. Yet, it really means to *make new*. To begin a new turn and direction around a center point. The spiritual revolution we are presently in is just that. We are in a collective up-leveling within the spiritual spiral.

Every person who has experienced their own spiritual awakening can recognize this evolutionary process on the planet right now, which has been growing exponentially since the early 1960s.

For the first time in our human story, the entire planet is experiencing a spiritual revolution, all at once, as we move collectively into the next phase of spiritual understanding. This new awareness will be the complete understanding of Oneness beyond all division of religious dogmas.

As we look at what appears to be crumbling around us, remember that this is what we are leaving behind. We are evolving into a whole new reality, a higher consciousness of human spirit. Hold on to that knowing. The Earth, Gaia and all of Her beings are experiencing a baptism of fire. We are all learning hard lessons as we face our collective unresolved issues and are forced to remedy them once and for all. This fire is burning off everything that does not serve us as we move up into a more celestial way of living. It is returning us to our true divine potential as we find love, peace and heaven within ourselves, and create it for the entire planet.

Envision an Earth experience where peace on Earth and heaven on Earth really are possible. Yes, there are many who believe this is impossible, but when enough of us make this our resolve, our revolution, it can be so.

## **When is The Ascension?**

The Ascension is foretold by ancient prophets as a time when all of humanity would be lifted up into a reality of harmony and prosperity. Every culture has a story about the end time and the beginning of a new time. That new time is The Ascension.

Spiritual Ascension is rising up in higher and higher levels of loving consciousness and brighter light within ourselves. The higher we each raise our loving consciousness in every thought, feeling and action, the closer we come to finding heaven within ourselves. This heaven within ourselves is translated and expressed outward into the world around us where we lift each other up into a collective ascension. We can literally reach the point where all that we see in the world around us is love, and life wanting to express itself as love. In this consciousness, we co-create peace and heaven on Earth.

The foretold Great Ascension is a process rather than a single moment in time. In my understanding, it began around 1963 when love began returning to the planet as a first wave of higher vibration consciousness. It was the dawning of the Age of Aquarius, when peace, love and harmony started to become our collective reality and a part of our open conversation. As people began waking up to the darkness around them, the negativity of the Cabal stepped up their side of the game. President John F. Kennedy was assassinated for his plan to expose the Cabal/Deep State. That event was the beginning of the end.

As more people have awakened to the dark game, and humanity becomes more enlightened, the darkness has become even darker. Like any sunrise, the brighter the light gets, the darker the shadows become, until the light becomes so bright it dissipates the shadows. The darkness becomes navigable singularities behind us rather than being all-encompassing around us.

It is always darkest just before the dawn and that is where we are presently. Although everything appears to be crumbling around us, it is actually dissipating what no longer serves us. We cannot ascend into a new reality based in love while dragging systems created in fear and darkness with us. In our new reality, we will be restructuring all of our systems to reflect love and light, rather than fear and darkness.

The Ascension is now. We are in the midst of it and it is in the midst of us. Those of us who choose to be the change we wish to see in the world are serving as divine interventions. We are calling it forward and creating it with every thought, word, feeling and action. The Ascension is a reflection of us, of who we choose to be. When enough of us choose to create a world based in love, it will become our collective reality. When enough of us ascend within ourselves, we will all ascend together, into the utopia that calls to us. Love is the vehicle for Ascension and is the energy of all creation.

## **Key Terms and Phrases**

144,000: The chosen ones who are sealed to lead the Ascension, as mentioned in the New Testament and across many ancient cultures. Those who are the first to become both informationally and spiritually awake have been chosen to lead the way for the whole of humanity to rise up into higher consciousness and the New Earth based solely in love. These chosen ones are often referred to as Light Leaders and Light Warriors.

Activation: Non-invasive energy transmissions from practitioner to client, helping the client to bridge their physical body with their soul for a more peaceful and spiritually guided life. We can also activate our own gifts through processing our unresolved issues and past beliefs; however, having a facilitator creates a much faster and smoother process. Activation in conjunction with personal processing leads to a higher perspective of the human experience.

Alchemical Transformation/Spiritual Alchemy: The process of energetically changing from one form to another. Changing our mind, heart, body and aura to be more energetically aligned with higher vibrations of Spirit (AKA God), allowing us to become “light bodies” as the light within us grows and expands beyond the previous limitations caused by fear.

Apocalypse: From its Greek origins, this word means “revelation”—to uncover or reveal what was not known before the unveiling. It has been mis-interpreted to mean the final destruction of the world. It is simply the end of the old world as we work together to create a new Earth. It is the end of the world for those being exposed for their dark deeds and the beginning of a new world for the rest of humanity.

Archangels: Angels of the highest rank. Their purpose is to guide and protect all humankind. They work very closely with the Ascended Masters to ensure humanity’s progress.

Ascended Masters: Beings who once lived on Earth in physical form. They mastered the human experience and as evolved souls, have committed themselves to helping humanity navigate the Earth experience. They are dedicated to protecting human evolution and Earth’s Ascension. They are also often referred to as angels and the angelic realm.

Aura: An energy field surrounding each of us that is emitted from the heart. It is also referred to as our spiritual body. The lighter and more loving our heart, the more powerful our auric field is in its ability to transmute approaching fear and attract into our lives a more loving and spiritual Earth experience.

Awakened/Awakening: No longer moving through life unconsciously. Awakening is multi-faceted: mental, emotional, physical and spiritual. All awakenings lead to greater freedom. When individuals wake up, they find greater personal freedom—as that spreads outward, it leads to collective freedom. Some people are more awake and able to see what has been hidden and disguised in our physical world, while others are more awake and able to see what has been hidden in our spiritual world. Once those who are awake to physical disclosure come together with those who are awake to spiritual disclosure, they will become a light force that cannot be stopped.

Beings of Light: Non-physical beings on Earth and in our air space who are here to assist us and protect us from harm. These include Guardian Angels, Spirit Guides, Ascended Masters, Archangels, Benevolent ETs and Elohim.

Cabal: Ancient ruling bloodlines who see it as their divine right to control all of humanity and every aspect of the human experience. Working with dark forces, they use fear tactics, arcane symbology and other tools to retain control. They were formerly known as Illuminati until more people caught on and started exposing their secrets. Over the millennia, they have often rebranded to keep themselves and their dark agenda hidden. To confuse the masses, they choose names that stand for the opposite of what they really represent; for example, Illuminati indicates being enlightened, but they are false light. As Zionists, they mis-identified themselves as Jewish, but they are not. They are the global leaders of the dark side and work diligently to maintain their agenda and purpose of control.

Chakras: Energy centers in the body that help people stay balanced and connected to both Earth and Heaven. The more we clear our chakras of mental, emotional and spiritual clutter, the more connected we can be to Divinity, with an easier flow of inspired energy.

Channeling: Receiving messages and communication from Spirit. Each of us is a stream of consciousness connected to the All That Is, which many call “God.” We each have the capacity to “tune in” to higher guidance from higher levels of consciousness that we can access by going inward (and upward). As we raise our own internal vibration into greater loving within ourselves, we are able to receive higher vibration messages in the same way the prophets of old once did. Channeling is the modern term for receiving revelation.

Christ Consciousness: The consciousness of infinite unconditional love and understanding oneness with God. Because Jesus of Nazareth, also known as Yeshuah ben Joseph, exemplified this consciousness more than any other being on Earth, he was given the title of The Christ. Those in greatest awareness strive to hold this level of loving consciousness within themselves. As more people wake up, the more Christ Consciousness will return to the planet.

Clearing: The process of releasing, letting go and discharging mental, emotional, physical and spiritual clutter within one’s auric field so that all that remains is a clear path, purpose and connection to the Divine. Clearing can also apply to cleaning up and decluttering one’s physical space in order to create a more peaceful existence.

Cognitive Dissonance: The state of holding conflicting beliefs. This can cause a complete stalemate and standstill in personal and collective progress as the conflicting beliefs attempt to cancel each other out. This is why conscious discernment is key. Processing old, limiting beliefs allows us to move forward into new, more empowering beliefs as we let go of those that block our full divine potential.

Collective Consciousness: The combined beliefs of any given group, society or culture. Every thought, belief, perception and action each of us experiences is energy; this unites with a larger field of energy that flows through all things as we each feed into it and it streams into us. When enough people focus in one direction, even when the actions are not obvious, others become affected by those thoughts. In fact, it is impossible for our thoughts and actions not to affect every other being on Earth.

Collective Reality: The combined reality for all life on Earth. Communication between individuals, where two or more are gathered in agreement, disrupts patterns in the old reality and begins new forward actions, which then become the new reality for those individuals. These also feed into the airwaves where we all unconsciously become affected by each other's thoughts. When enough people think in a particular direction, it creates action toward that direction, and that becomes our collective reality. If we want to create change, it requires a critical mass to place focused intent in that direction.

Conscious: The state of being awake and aware.

Conscious Choice: Deliberate and mindful choosing. Whether we recognize it or not, most of our choices are made unconsciously; or rather, by our subconscious thoughts, which are based on subconscious beliefs. Most of our choices are made without really thinking about them. Once we recognize the difference between unconscious programming and conscious living, we can choose deliberately to make changes in our personal and collective world.

Conscious Objective Observer: One who has the capacity to look at a situation without becoming emotionally charged and the ability to recognize how to best discharge the dark forces and negative energies within that situation. Observing without getting sucked into the emotional charge is essential for inner peace and seeing clearly what is necessary to move forward. While the full range of emotions is a unique part of the human experience, our ability to feel and then hold in neutrality is part of the human mastery.

Conspiracy Theory: A belief or concept identifying individuals and/or corporations to have conspired against the wellbeing of a group, culture, or humanity at large. Some are mindless theories which cannot be substantiated and can be harmful. Some are conspiracy fact which can be substantiated but the substantiation has not been released openly to the public. As theories become proven facts, they become part of history, although often without open acknowledgement. The government testing the effects of LSD on unwitting US and Canadian citizens is an example of a conspiracy theory becoming conspiracy fact yet swept under the rug for the unwitting masses.

Dark Overlord: Also referred to as Satan, Lucifer, Beelzebub, Devil and other names that represent the purveyor of fear, deception and temptation. This non-physical entity is represented in many different depictions and exists for the sole purpose of propagating the fear and darkness many call evil. He has numerous minions of varying authority levels working in every system on Earth until we cleanse the planet of him and his deeds. The Earth will then be restored to a place of peace and become the garden it was before fear arrived here.

Dark Side: The dark contrast in the human experience. As souls, we agreed to experience the contrast of the Earth school and accepted the challenge of finding our own light in the darkness. In order for us to experience this contrast, there is a dark side in all things, even within ourselves. The darkness is meant for us to learn through and not to be consumed by. When our souls collectively choose for Earth to be a resting place, the dark side will cease to exist, and fear will simply become a medium for growth.

Dark to Light: Restoring the balance of contrast. Fear and darkness have been spreading over our planet like a virus to the human heart and mind. As more people have been finding their own light, the darkness has become darker. The Great Awakening is exposing the darkness, shining a

light upon it, and dissipating it until all that remains are shadows of our past to process and learn from.

Deception: Fear disguised as love and darkness disguised as light. The dark side has always known how to deceive the human mind into acting in ways that cause harm against ourselves and others, believing we are doing it for the light. Discernment is the key to staying above the fray and deciphering whether what we are being told is the truth of love and light, or a deception painted as such.

Deep State/Globalists: A group of individuals and their multi-layered corporations that manipulate and control every aspect of the collective human experience and give the illusion that we have free-will-choice through blind compliance. This web controls religion, government and financial institutions as well as all mainstream media, food production, medicine and nearly every way of life. They control humanity from the belief that they possess superior minds and capabilities, and the masses are incapable of choosing what is best for them. In this belief, they have corrupted the entire human experience and broken the prime directive of free-will-choice.

Digital Warriors: Human beings who recognize that we are in a revolution and doing what is necessary to help expose the darkness and free humanity from its hold. They are a rebel alliance working across the globe to spread the truth. They use all social media sites to send the messages forward, very much like other underground communications in previous revolutions and uprisings, yet utilizing the newest technologies.

Dimensions: Spiritual (as opposed to physical) dimensions of consciousness. The higher we raise our personal consciousness into greater loving and higher light, the more we move into higher dimensions of living and being. Collectively, we have all been living in a third-dimension reality where we have experienced the polarity of fear and love. The fourth dimension has converged with the third dimension and is the reason we have been experiencing the extreme duality. The fourth dimension is driven by emotion. It is the veil between heaven and Earth. It is called the dark tunnel, limbo, spiritual prison, breakdown, cocoon, dark night of the soul and other names for the darkness of transformation before exiting into the fifth dimension. The fifth dimension is heaven on Earth as our minds, hearts, bodies, and spirits exist in peace, love, prosperity and harmony with all other beings. The fifth dimension is the Ascension destination. Higher dimensions are available for consciousness and energetic co-creation.

Disclosure: Exposing corruption and deception. Corruption is being brought into the open and put out into full view for all the world to acknowledge and notice where humanity has been manipulated. Disclosure is the first step to healing. It is necessary to learn the lessons that need to be learned from the experience and create a new world where the corruption cannot be duplicated.

Disinformation Warfare: Intentional mistaken information provided to the public through mainstream and social media outlets. The disinformation campaign exists across every issue, and on both sides of every issue, to confuse, mislead and divide the masses.

Divine Human Blueprint: The original genetic design for our species. This blueprint was pure, free of disease and corruption and had the capacity for magical manifestation. It was coded for love, compassion and prosperity. Once fear infiltrated our planet, as described in many of our ancient myths like the Garden of Eden, our genetic makeup became corrupted. This created

disconnection, lack and competition. We are now striving to restore our original genetic code and blueprint where all things become possible as love through us.

Divine Intervention: Direct assistance of God, angels, benevolent extraterrestrials and beings of light. As creators and embodiments of God, we are also divine intervention in action as we work together to create a new reality based in love.

Dogma: An inflexible set of principles, rules or beliefs. It is the groundwork of many religions and also can be an ideology of any kind where “my way is the only way.” It can be so ingrained that it becomes part of an individual’s personal identity. This can often lead to being so blinded by belief they simply cannot see the perspective of anyone else.

Empowerment: Power from within. Finding our true divine human potential within ourselves and using our divine power to help heal and transform the world.

Enlightenment: Greater understanding of possibility. The mind becomes open to allow more creative light to enter and as this happens, we are able to see new possibilities for ourselves and all life on Earth. More light, love, beauty, creativity and even a greater spectrum of color stream through new levels of light and love consciousness.

Extraterrestrials: Beings that are not of human form or of Earth’s origins. Many people now acknowledge that we are not alone in the Universe and that the entire Universe was not created just to support humans. ETs have been spoken and written about since the beginning of known time. These non-human life forms can be either benevolent or malicious. Angels and demons might also be included among them, as mentioned in some ancient texts.

Fake News: News that is distorted to meet a particular agenda or is entirely untrue. In a world where anyone can say anything without having real proof, or can twist or alter facts, it is vital that we use discernment to determine if a story is true or not. We are past the Information Age and well into the Age of Discernment, which means developing our conscious choice muscle.

Fear: False Evidence Appearing Real. At its core, fear is our basic response to stress and is instinctual to basic survival. However, for some people in our human story it became a tool for control and manipulation. Fear provides us with opportunities for growth and learning through the darkness; however, holding onto fear-based beliefs prevents us from moving forward and finding our true divine potential within the human experience.

Fear-Based Beliefs: Individual and collective beliefs that keep us small-minded, limited, divided and controlled. Fear-based beliefs stifle the human spirit and keep us from the freedom to fully and lovingly create and co-create a reality where everyone thrives. Fear-based beliefs create division from each other and from God.

Fiat Money System: Financial system connected to the Federal Reserve, Internal Revenue Service and Banking. This configuration is based entirely on debt and borrowing money that pays interest. Our birth certificates and social security numbers are used to borrow against us. We are the collateral that backs our currency rather than gold-backed currency. It is also referred to as the enslavement system, since it is driven by human productivity. Productive taxpayers are considered assets while unproductive members of society are considered liabilities by those who control the system.

Focused Intent: Where we hold our thoughts, attention and intention. Our thoughts are just as, or even more, powerful as our actions. Thoughts, if held long enough, become our beliefs, and beliefs lead to actions. Our attention and intention—how and where we place our focused thoughts—drive the creation of our reality.

Foundations: Non-profit trusts that exist for humanitarian and environmental benefit. They are only accessible to the ultra-rich and are often used as a means of paying less taxes than would be paid otherwise. In the hands of the dark side they are used for money laundering and nefarious activities, while giving the impression they are working for light. That is what the dark side does, using words that appear light and loving to obfuscate that their intentions are the opposite of that name. This tactic deliberately makes it difficult for humanity to decipher light from dark or love from fear; effectively hides the deception; and ensures the successful infiltration of all systems without detection.

Frequencies: Everything in existence vibrates as energy. Thoughts have frequency. The heart emits electronic frequency. The planet has its own frequency. Lower frequencies are based in fear and higher frequencies are based in love. Lower, fear-based frequencies are dark, heavy, oppressive, limiting and sabotaging. Wallowing in them can lead to dis-ease of the mind, body, heart and spirit. Higher, love-based frequencies are uplifting, light, expressive, expansive and empowering. Swimming in them makes all things possible.

GCR: Global Currency Reset. The envisioned future balance and restoration of all currencies across the planet to full value based on each country's natural resources. This may also include total debt forgiveness between countries so that all countries start with a fresh balance sheet. This would be a transition phase as the New Earth based in love and harmony may have no form of exchange, only giving and receiving from the heart, and cooperation in all things.

Global Financial Reset: A rebalancing of the books. The goal is to end to our present debt-based currencies as Reserve systems are closed out and new money becomes backed by natural resources rather human resources. Money will be exchanged through a new Quantum Financial System, (not the same as digital currency), allowing for free flow throughout the globe. This reset will lead to more personal freedoms, religious freedoms, economic freedoms, and political freedoms as humanity is no longer bound by financial enslavement.

Great Financial Reset: Not to be confused with Global Financial Reset. Many say this is the globalist vision of further enslaving and controlling humanity. It is part of the New World Order 2030 Agenda now in process, with a goal of eventually being able to track, manage and control all life on Earth. On the surface it looks like the answer to all our problems. It proposes financial security, job security, free education, free housing, and complete debt forgiveness, all in exchange for higher taxes and less personal freedoms.

Golden Age: The time of peace, freedom and prosperity for all life on Earth. Some predict it will last for over 1,000 years. Others say humanity will be invited to become part of the Galactic Federation as we become advanced enough to understand higher protocols and teach other planets what we have learned.

Higher Consciousness: Being spiritually awake and attuned to higher knowing. It is internalizing the awareness of our direct connection to the unseen, our higher-self, higher-mind, and infinite connection to Source/God/All That Is.

Illuminate: To light up the darkness in order to see our personal and collective shadows, learn more from them and de-energize their unconscious power to create division and keep us from our full divine potential.

Infiltration: Dark hijacking of minds, organizations and systems. Our minds are directly connected to a stream of consciousness through multiple dimensions, all the way up to the highest divine, loving truth of God. This is how we become inspired to create and imagine in the likeness of God. If we do not protect our minds, the stream of consciousness can be hijacked by lower energies, as dark, negative and fear-based thoughts. This hijacking causes us to think, act, speak and act in unloving, hurtful ways toward each other. Every person who has ever performed acts of so-called evil or harmed another being has been infiltrated by negative influences. Prayer, meditation, and specific intention can create spiritual protection from infiltration. Infiltration of organizations and systems can also occur as individuals with ill intent make their way into decision making positions and turning a well-meaning organization into a nefarious one without supporter's awareness of the change.

Inner Work: Digging into our past beliefs, painful memories, traumas and unresolved issues to heal, resolve, let go and discharge everything that does not serve our highest good and blocks us from being in Divine flow. This is based on the understanding that wherever we go we take ourselves with us. If we are to be the change in the world, we must first be willing to change ourselves; to dive deep into our psyches to heal all that needs to be healed and resolve all that needs to be resolved. We do this in order to serve as a beneficial presence on Earth.

Light Workers: Individuals across the planet who have found their own light and are working to grow the light consciousness. They can be found in every belief system and community around the world, as shining beacons for humanity. These people became spiritually awakened and activated their spiritual gifts before most others in order to help the masses emotionally and spiritually navigate the Great Awakening and Collective Holy Shift, while also facilitating the required healing to move forward into the higher consciousness of Ascension. They lovingly support all systems of belief, knowing every person has their own path to God, and often have a direct connection with God. Some are also referred to as Light Leaders and Light Warriors.

Magic/Witchcraft/Sorcery: Working with energy to create a desired result. Magic itself is neither good nor evil; however, the way it is used and who it is used by determines whether it is light magic or dark magic. The Universe works its magic through synchronicity.

Mainstream Media/MSM: National and corporate syndicated news sources. Mainstream media has always been used as propaganda for control and to program the masses through fear-based news. Every revolution and liberation that has ever been won, resulted through underground movements and independent communication.

Mandela Effect: assumed memory loss or false memory for many people across the planet. It is hypothesized that this strange occurrence is the result of alternate timelines being experienced by the masses within our collective reality.

Master Mind: The All Mind of the Mother/Father/Source God from which all creation flows.

Mockingbird Media: The multitude of MSM news outlets repeating the same talking points. It is a very effective form of propaganda for subconscious brainwashing and social programming.

Multi-Dimensional: The consciousness of experiencing life and circumstances through more than one spiritual dimension. Multi-dimensional consciousness is part of the human expansion. Although we live in the physicality of Earth, which is presently based in fear, our consciousness has the capacity to communicate with higher dimensional beings and experience our reality in higher dimensions of thought. Through multi-dimensional consciousness, we can bring heaven to Earth.

Negative Influences: Unseen deception and dark infiltration. Negative influences exist in all systems and are so pervasive they can keep us mentally and spiritually asleep and blind to the bigger picture playing out on our planet.

New Age: The current era of enlightenment. Combines new spiritual understanding with ancient wisdom. Tools and healing modalities once used in ancient times have been restored with a deep love for Spirit. Many who don't understand this as a deeply loving and divine light practice have been taught to be afraid of it. Some have been taught that new enlightenment is evil, when it is quite the opposite. This misperception is another deception fed to humanity to maintain fear, keep us divided and prevent us from finding more love, light, freedom and spiritual connection.

New Earth: What the planet will become once we rise up and out of our present fear-based reality and create an entirely new reality based solely in love. This New Earth is akin to the Garden of Eden—the peaceful place Earth was before fear was introduced to the planet. We left our divine Mother's garden to experience right/wrong perspectives and learn from our experiences through the contrast of fear. We are returning to the garden where all of life flourishes so we may once again be at peace.

NESARA/GESARA: National/Global Economic Security and Recovery Act, a proposal and plan suggested by Harvey Francis Barnard to establish peace and prosperity for humanity and remove corruption from all systems. Some say the Act has been approved and is in the process of being enacted.

One Earth Consciousness: Understanding that we are all one family and that our planet is home for every one of us. This consciousness is based solely in love, caring and compassion. Because all beings are created equal and are equally worthy of love and thriving, we take care of each other, all life forms and the Earth by loving choice.

One World Order: A plan for the Cabal/Elite/Powers-that-Be—those who see themselves as above the rest of humanity—to take over every world system and remove personal freedom. It is a plan of absolute control in the disguise of security and absolute power in the disguise of safety. Their plan is one global government, with all banking, currency, taxes, healthcare, food, education and environment all managed under one system, with those at the top making choices for all the rest, who feed into the system through human production. Simply put, it is a slave and master system, with the slaves treated well enough that they don't revolt. On the surface, it is sold to us in a way that looks much like One Earth Consciousness, which is why so many people unconsciously support it; but it is a deception. They are mirror images of each other, one on the light side and the other on the dark side, and they lead to opposite realities.

Oneness: The understanding that we as humanity are all one body of consciousness and we are all one with God. As such, it is impossible to be separate from each other. All choices we make—individually, as co-creators with God and as inter-creators with each other—affect all life on Earth and become our collective reality.

Patriots: Individuals who are sworn to uphold the original constitutions of their free countries and are committed to the freedom of humanity and all life on Earth. Many also consider themselves to be revolutionaries and rebels against the tyranny of One World Order. The dark side uses mainstream media to portray Patriots as gun-loving, racist, misogynistic, anarchist, right-wing, lunatic conspiracy theorists, while most are simply in the online trenches fighting for the freedom and protection of all humanity.

Pattern Interrupt: This occurs when breaking an individual's routine, habitual thoughts or behavioral patterns in a deliberate way that shakes them up. Being shaken out of our habitual patterns is part of the awakening process. The COVID-19 coronavirus is an example of a mass pattern interrupt, giving all of humanity an opportunity to wake up and begin a collective quantum leap of consciousness and global transformation.

Personal Shadows: Aspects of ourselves that are based in fear and judgment. Everything and everyone on our planet is made up aspects that are both light and dark. It is the contrast our souls agreed to navigate in order to find true light within ourselves and return to the light of God within. All beings show their good side, their light side, on the surface. The shadows are kept in the dark. These shadows are the subconscious controllers of our reality until we expose them by illuminating our inner light and turning to face them. These shadows are fear-based beliefs and aspects of ourselves that we have ignored and even shunned, which continue to control us until we face, recognize, heal and transmute them with love. If not acknowledged, processed and resolved, they become darker and deeper, leading to painful relationships and dis-ease in the mind, heart and body. There are also collective shadows in our human story that need to be healed.

Prime Directive: The primary law under which all other laws follow. The prime directive for Earth is free-will-choice. This is the primary law of God for our planet and cannot be broken or interfered with. Those who have been intentionally tampering with free-will-choice will be brought to justice during the Great Awakening process.

Processing: The act of intentionally looking at all of one's unresolved issues, painful experiences and past beliefs with the objective of consciously learning from them. Learning takes place by determining whether each belief and memory is based in fear or love; if they are based in fear, you must change your perspective and perception by reframing them, so that they become beneficial to your personal and spiritual growth.

Project Looking Glass: Advanced technology owned by the U.S. military allowing individuals to see into the future to view all potential outcomes. This secret project was leaked to the public in early 2020. It is hypothesized that this technology came from reverse-engineering crashed extraterrestrial spaceships. My personal understanding is that it works by computing all timeline options and alternate realities related to the end game, providing the “good guys” with the ability to navigate each play so that every possible scenario ends with the Light winning on behalf of

humankind. It is akin to a very complex game of chess, requiring forethought of every possible move made by both the Light and dark sides, with each side playing out their moves for the intended final result before leading into the next phase of human evolution.

Projecting: Making judgments about another person's character based on unconscious beliefs one has about themselves. Inner unconscious negative beliefs and judgments we have about ourselves and past experiences become the lens through which we view other people, whether or not they have those same qualities. Projections of self-judgment prevent us from seeing divinity in ourselves and others. This projection process also occurs with positive beliefs, as we assume others hold themselves to the same standards we hold for ourselves.

Q/QAnon: Q is an enigma, a series of codes for deciphering and communicating The Plan for exposing corruption and bringing justice for all. Some hypothesize that Q is an individual or military intelligence with access Project Looking Glass. QAnon are followers of Q and decode the messages of the game plan. Members of QAnon are global allies who dig into the tunnels of corruption, decipher the Q codes, and then spread the decoded messages forward to the revolutionaries and awakening ones.

Quantum Leap: A rapid advance in evolution. Evolution is a process that takes place over long periods of time, adapting to change as needed for survival and expansion. Occasionally, there is a leap in consciousness, often ignited by those we might call our greatest Masters in science, technology, art, music, spirituality and other areas, rather than the slow, consistent growth of physical evolution.

Red Pill: Accessing hidden information (derived from the 1999 science-fiction film, *The Matrix*). Someone has been "red-pilled" when they start seeing the disclosure of hidden truth and misinformation fed to them by the mainstream media and recognizing the false reality they've been living in. Being red-pilled can be extremely uncomfortable as it causes initial cognitive dissonance before the truth settles in.

Reflecting/Mirroring: Having our own issues and qualities being mirrored back to us by another person or situation. Who we are and what we believe about ourselves—both positive (inner light and love) and negative (our dark shadows) is reflected back to us to see it inside ourselves for self-awareness and healing.

Resurrection: Lifting up and restoring our wholeness and the wholeness of God in all things. An important part of this is resurrecting the Divine Feminine with all of Her goodness, compassion, caring, understanding and nurturing to heal the broken hearts of humanity and restore Her mantle alongside the Divine Masculine in unity and harmony.

RV: Revaluation of currencies. See GCR for more details.

Sacred Geometry: The symbology of geometric designs found throughout all of nature, presumed to be of divine origin. Such patterns can be found in every culture and belief systems, back to the beginning of known history.

Satanic Rituals: Practices performed to appease Satan. Satan is the overseer of darkness and is the god of false light. He has also been recognized as Lucifer, the fallen angel of light. Following him presumably guarantees becoming a star—an eternal legend in the limelight with limitless wealth and notoriety. His guarantees, however, require human sacrifice, often cloaked in the

guise of war or violence, while using God's name in vain as justification for harm against the bodies of humanity. Sacrifices are also performed in secret rituals, ensuring that one's soul is committed to the dark side. As we create a world based in love, all who worship the dark side and sacrifice humanity in exchange for greed will be exposed.

Second Coming: The return of Christ Consciousness. This return ensures we all ascend into a new reality of unconditional love, inner peace, mutual acceptance and divine oneness. Some believe this Christ Consciousness has already returned to the planet and has been playing a vital role in the spiritual awakening of the masses, which has been in process since the 1960s. Others believe The Christ will return in physical form to lead the way into a New Earth reality and oversee the reconstruction of humanity.

Secret Societies: Organizations whose activities, events, functions, or membership are concealed from non-members. Those currently thought to be connected to the Cabal/Deep State include: The Illuminati, The Freemasons, Skull and Bones and Bilderberg. Some also postulate that the Council on Foreign Relations and the United Nations, among other organizations with a Humanitarian front are secretly working on behalf of the Cabal and the New World Order.

Shadow Government: Governing that takes place secretly, behind the scenes of what we see on the surface. The shadow government gives the impression of representing us, serving us protecting us, and making choices that are best for us. However, beneath the surface are individuals who control and steal from the masses, while painting it as "social security, welfare and safety." The shadow uses words to make us feel safe and secure, while siphoning the tax money we have entrusted to them for our collective well-being, instead using it to feed their greed and need for control.

Social Engineering: Psychological manipulation of people to get them to act in a certain way in order to regulate the future development of a culture. This is most effective with repetitive propaganda, particularly when concurrent with heightened fear and driven by emotion.

Spirit Guides: Also referred to as guardian angels and passed loved ones. For some people, whose role it is to help guide humanity on the ground, this also includes planetary guardians and archangels. We all have the capacity to communicate with our guides telepathically. Many have simply been told they cannot (or should not) and have therefore never activated their telepathy beyond basic intuition.

Spiritual Bypass: Recognizing our personal and collective unresolved issues and declaring they no longer bother us because we have risen above them, without extracting the full lesson the suffering can provide and processing the emotional attachments to those stories. We then stuff the issues back down so that we no longer need to look at them, because we would rather focus only on what feels good. This is marginally better than the denial that sweeps emotional pain under the rug or puts it in a closet so we can pretend it never existed. However, until those issues are resolved and healed, they will continue to surface again and again, until they are fully healed and permanently learned from. We can recognize spiritual bypassing when there are still negative reactions surrounding a particular experience; it often goes hand-in-hand with spiritual arrogance and self-righteousness.

Spiritual Hijacking: The dark side using spiritual practices, tools, technologies, terms and phrases for its own dark purposes. This sometimes makes it difficult for humanity to decipher light from dark, love from fear, as the dark side is a mirror image of light side.

Spiritual Progression: The evolution of the soul as it learns through life experiences. Many believe this occurs over multiple lifetimes, and possibly other planets, as continual learning until one achieves spiritual mastery.

Spiritual Protection: Shielding our mind, heart, body and auric field, along with everything in our domain of care, from negative and nefarious energies. We all have the capacity to protect ourselves from infiltration of other people's thoughts, beliefs, feelings, projections and energy as well as negative energy from anything outside of ourselves, including dark spells, magic, hijacking and tracking. Spiritual protection is especially vital for those who dig into dark tunnels of corruption. Digging into the darkness can attract spiritual leaches and dark entities into the mind, causing depression, anger, resentment, and extreme judgment in even the most loving person. Knowing our word is law, and we create our reality, we can claim protection of our mental, emotional, physical and spiritual bodies.

Spiritual Tools: Metaphysical and physical techniques to help stay connected to peace, love and Source (AKA God). These methods can include breathing to a calm center, gratitude, forgiveness, compassion, prayer, meditation and so on. Some people choose to use these in conjunction with physical tools such as sacred geometry, candles, crystals, incense, sacred emblems and tokens such as a rosary or cross to help them stay spiritually grounded.

Spiritually Awakened: Enlightened to greater possibilities of our human nature and awakened to the divinity within ourselves and others.

St. Germain Trust – Also known as the World Trust Fund, based upon the wealth of precious metals and jewels. Although originally of good intent, this is not the true path to prosperity for all. The entire flow through of trusts and foundations has been compromised and are no longer pure of heart.

Telepathic Communication: The ability to communicate non-verbally. Most people experience this in long-term relationships, for example in marriage, where they know what the other person is going to say in advance. Telepathy is the ability to hear what is not being said out loud. It is how we communicate with God and how God communicates with us. It is a form of communication that can be activated and practiced. Non-verbal autistics are often born with this gift fully activated and often have an incredible connection to the Spirit World and spiritual understanding.

Transcendence: Moving above and beyond the physical experience. Transcendence allows our consciousness to see our life experience from a higher perspective, giving us the ability to rise above it and gaze upon it, rather than feeling stuck in it.

Transformation: Changing from one form to another. We experience this multiple times in our lives as we move through phases of growth. For many, this eventually includes a spiritual transformation as we come to recognize our own spiritual beliefs, essence and connection, which may not be the religion we were born into. This transformation process is often depicted as a caterpillar remembering what it truly is and was always meant to be, before emerging into its full glory as a butterfly. We are now in a collective transformation, with humanity moving from its

caterpillar phase into the cocoon, as all our systems and perceived reality break down. We will reconstruct ourselves and emerge from our dark cocoon into a new world that is so much more beautiful than we can now presently imagine.

Transmute/Transmutation: Changing fear and darkness into love and light. We have the ability to revisit past painful experiences, unresolved issues and shadow aspects of ourselves that were hidden, expose them, and turn them into learning lessons rather than suffering. This occurs by shining light into our own dark stories and viewing new perceptions through continual application of love in all its forms and functions. This process is also necessary for healing and uplifting the entire human/Earth existence as well, as our own personal experiences, beliefs and issues.

Tuning In: Listening to Spirit's guidance. A non-religious term for praying and actively listening for answers. This guidance can come from our higher selves, guardian angels, beings of light and God. It is vital to clear your field and set spiritual protection before tuning in to ensure that no lower energies and thoughts can infiltrate the messages you receive. Much like tuning into a radio station, your own vibration and the vibration you tune into determines the quality of the message.

Tunnel Diggers: Individuals who take the time to research into the dark side and then bring the information up to be spread forward. They follow money trails, lost history, hidden secrets, etc. and are vital to the revelation and revolution.

Unified Field: Where two or more are gathered (not necessarily in person) with a singular focus and conscious intent. In this interconnectedness, miracles, breakthroughs, coincidences and synchronicities can occur in amazing ways.

Unity Consciousness: The opposite of duality perception. Duality is the belief that one must lose in order for another to win; also known as the zero-sum game. Duality keeps us stuck in "divide and conquer" mode; there is always an Us vs. Them/Right vs. Wrong scenario. Unity consciousness focuses on what is best for all concerned. There is no win/lose or Us vs. Them... there is only We. *Where we go one, we go all*—and we are all in this together.

Unresolved Issues: Fear-based beliefs and unconscious programming surrounding past painful experiences that keep us stuck in the present. All of us have fear-based beliefs and painful memories that began in childhood and have replayed themselves in various scenarios throughout our lives, becoming our personal pain stories. These ego and heart wounds must be processed and resolved, in order to learn their lessons and end the story for good. Once we learn how to view and resolve our personal unresolved issues, we can use that same healing process to navigate and heal our collective human story and unresolved issues.

Vesica Piscis/Venn Diagram: Sacred geometry figure consisting of two or three circles of equal size, overlapping each other at the center. In Latin, vesica piscis literally translates to "Vessel of Fish" due to the design's resemblance to a fish. This graphic is an integral part of the Flower of Life, a sacred symbol for all creation, where apparent opposites meet in harmony with the potential to create something entirely new. Regarding our present political polarity, with each side represented as a circle, the extreme left and the extreme right are both manipulated by the powers that be for the sole purpose of driving humanity into greater fear, hatred and division. The 2% on the far extremes are the loudest voices that drive the division and perception of the

other 98%. In the center, where both circles overlap, liberals and conservatives actually see eye-to-eye.

Vibrations: See Frequencies.

White Hats/Light Alliance: International group of individuals dedicated to penetrating and dismantling the dark agenda.

Woke Washing: Language intentionally used by organizations, corporations, media and politics to give people the perception that they have the morality and intentions that are best for humanity and all life on Earth to illicit our support for their product, service or movement.

WWGOWGA: *Where we go one, we go all*. A QAnon hashtag for The Great Awakening. We are all in this together. Stay together, stay one, stay united. No one gets left behind. We are one.

## **Bridging the Divide**

Patriots and Light Workers have been pitted against each other in the dividing terms of Conservative vs. Liberal. The truth is, the most open-minded people of both camps overlap and meet in the middle of a Venn Diagram. Within the loving center, both sides are warriors fighting for freedom, peace, harmony, prosperity and all loving aspects of the One Creator (God) on behalf of all humankind. They are far more alike than they are different. The dark powers that be (Cabal) have set them in opposition to each other, knowing if they ever united in one mind and purpose, the rulers at the top would be overthrown.

Those controllers of the planet know that all they need to do is say the right words to keep both sides divided and conquered. The powers that be know how to play the people as pawns in this very complex game of chess. They know how to use just the right words to spin human beings into blind compliance. Yes, free-will-choice is the prime directive on our planet, and they know that if they can word the choices exactly right, people will comply without any real trouble.

For the Christian Conservatives, all the controllers need to do is add Jesus or God to their agenda and people blindly follow. They've been doing it for thousands of years. I grew up this way and I see how easily blind faith is manipulated. Too many harms against humanity have been justified in the name of God, using God's name in vain. For the Light Working Liberals, all they need to do is add Love, Peace and Unity to their agenda and people blindly follow. Lightworkers want to believe that those in charge want peace, freedom and equality that calls to their own hearts. That desire makes it easy for some of the most loving and light filled individuals to be blinded to the psychological manipulation.

When we strip away what we are being told about each other by outside sources and look only at the mutual purpose of Awakening and Ascension, we can see how powerful we are together, as one. We, united, are a light force to reckon with; together, we will create a new reality based in love, with Divine Love for all life on Earth as our guiding force. Unity will be the primary building block of our New Earth creation.

## **Light Speed Ahead**

We are in the midst of a reality split. The descending reality is based in fear, violence and control. The ascending reality is based in love, harmony and freedom.

All Hell *is* breaking loose and this is great news! It is breaking loose of its control over humanity. We will find the light at the end of the tunnel and rebirth ourselves as beings of light and love in a whole new world. The New Earth many have foretold for thousands of years is upon us. We will have a thousand years of peace, or more, as we choose our planet to be a place of peace.

There will be many who choose to stay in the present fear-based reality because that is where they are comfortable. They like their stressful news, negative television, violent movies, sport conflicts, division and false sense of security. They are as happy as they know how to be; even when made fully aware of the game that is being played on them, they will choose to stay and play that way. Some people feel right at home where they have always been enslaved because the unknown world is more frightening than the discomfort of their comfort zone.

Others who would prefer the new reality based in love, harmony, peace and prosperity, sadly, will not be able to make the jump to light speed. Their physical bodies simply cannot make the alchemical shift necessary to exist at the higher vibrational frequencies. And some who believe themselves to be awake and aware will also not be able to make the shift, at least not in the beginning, since they cannot let go of hatred, anger, blame and resentment toward the past. Once they let down their resistance to change, love will enter their hearts so they can move forward.

Those who are both physically informed and spiritually awakened will lead the way into the new reality, as many already are. The more of us who learn how to consciously lift ourselves up out of fear and into love, the faster we all can move in our new ascended reality of peace and Heaven on Earth.

We must each be willing to do the inner work to process our own fear-based beliefs, transmute our pain stories, clean up all of our personal judgments and dismantle unloving perceptions. We also need to let go of spiritual arrogance and self-righteousness if we are to create a world of peace, harmony, equality and prosperity.

Light will prevail...and it is light speed ahead! While there will be some who cannot make the switch to light speed, most will. All it really requires is an open mind, a loving heart and a genuine desire for a better world.

## All for One

Those who have awakened first, both with physical information and spiritual awareness, are destined to help the rest of humanity navigate the pain that comes with all breakdowns. The entire planet is being invited to ascend into the new loving reality rather than only the chosen few. All who can raise their vibration into love and light will be ascending into the new world, as we prepare the place for them. Where we go one, we go all. No one gets left behind except by their conscious choice.

As creators of our reality, inter-creators with each other and co-creators with God, we collectively choose when we are finished with learning through suffering. We choose when we are finished with the dark contrast we have labeled as evil. We collectively choose when we are complete and no longer allow fear to control our outcomes and physical experiences. As one human body, as a collective of souls, we choose when we are finished with Earth as a learning planet and choose to make it a place of peace.

We have the vision to see what has happened in the past and what is occurring in the present, and we are the visionaries that will create a new reality. As darkness and dis-ease are brought forward, we are collapsing all systems and structures that we have collectively outgrown and are now being given the opportunity to create new systems and structures that serve all of humanity—systems that support all life on Earth. All of the fear, deception and corruption is being brought to the surface for acknowledgement and resolution. We cannot take our baggage with us into the new world we are inter-creating.

In 2013, I received a message from The Guardians of Light and Protectors of Earth's Ascension. These are Ascended Masters and Archangels who are working on our behalf in higher dimensions. As I stood outside my house, I saw the etheric image of an older man and was told he was a man of notoriety and influence. At the time I did not think to ask his name, I was simply surprised he was not a politician. On my left I saw the etheric image of Hillary Clinton. My walkway divided them. I heard the words, "Between him and Hillary, they will disclose all of the corruption." At the time, I knew nothing of Hillary's back story, and I expected they would be working together to expose the corruption. Because of my own expectation, I did not see the correlation when Hillary and Donald Trump went up against each other in the 2016 election, three years late.

When Trump won that election, it was clear to me that he had been put into place to collapse all existing systems so that we could reconstruct them, but I did not recognize him as the one who would expose the corruption. In 2019, after a friend I deeply trust told me about Q and Trump's role in actively ending the corruption, at first, I was resistant to the idea. I only saw him the way mainstream media portrayed him. I checked in again with the Guardians to help me see what I couldn't see. They confirmed that he had been chosen to be a "bull in the china shop" and the "wrecking ball" needed to bring down the structures of corruption. More recently they called him, "Billy Goat Gruff," the one who puts the monsters in their place and makes the bridge from one side to another passable; again, they indicated that "dark players" had been put into custody with Trump as the custodian. He was the one I saw standing opposite of Hillary Clinton all those years ago, who would help to expose the corruption. From a spiritual perspective, their souls are

working together to collapse the old game. In the physical perspective, between the two of them—with Clinton on her side and Trump on his, not in cooperation—the game of deception and corruption will be exposed.

As difficult as it may be for some people to accept, Donald Trump was chosen by The Guardians years ago to expose the corruption and break down the old world. He is where he is because humanity needed him to be there. He understands the money game more than most and he is not afraid to destroy what needs to be destroyed. How long he will remain in that role is yet to be determined. I do know that to create a new world, the old world needs to finish breaking down and he is a critical part of the collapse of all fear-based systems.

Remember, he is just one man. He is a human being with all the fallibilities of being human. While he is a catalyst for massive change, WE are the change. Our collective consciousness and the choices we made created the mess that we are in. Our collective consciousness and the choices we make moving forward will create the new world. God helps those who help themselves and it is up to us to step up. The Universe is always working on our behalf and provides us with what we focus on. The more we focus on lack and brokenness, the more we receive the same. We need to first shift our focus, and create from what we want, rather than from what we don't want. We can blame this present reality on Satan, his followers and his minions. We can continue waiting for Jesus to come and rescue us as our ancestors before us did, while our reality continues to go downhill. Or, we can accept responsibility for the truth that we have collectively created our reality and we will collectively re-create it.

We are made in the likeness and image of God, and as such, we are creators. We have created our reality and we have within us the ability to create it anew. We are all creators and we are all divine intervention. We are all one with God and God works through us. All of us are the re-creators that will step forward and design the new reality. We will create the new constructs that will be put into place for an entirely new human experience. Anything we can imagine is possible, because with God, with love, all things are possible.

Rather than focusing on the problems and complaining about what has not worked, let us get to work focusing on solutions. The reason we are in the mess we are in is because we've been waiting for someone else to clean up after us, do the work for us, rescue us and make our decisions for us. We are the ones we've been waiting for and we are the ones who will save humanity from itself. When enough of us do the inner and outer work to make it so, then we will have the peace and Heaven on Earth we seek.

That will never arrive while we still hold any aspect of our personal and collective story in hate, anger, shame and againstness. It will come when enough of us learn to see the entire human experience through the eyes of gratitude—gratitude for all of it—all of the pain and suffering along with all of the beauty, and yes, grateful for all of the lessons it has provided us. It will not occur until we forgive ourselves, our ancestors, our collective past and the entire human story. And it will not occur until we have faith in each other.

Have faith in humanity, have faith in yourself and let the light of living love guide you forward. Together we will envision and create a new reality, the new golden age of humanity, where all flourish in peace and prosperity. Yes, I really do think this is possible; it just needs enough of us to believe it is and be willing to see it for all of us. Utopia, where all of life thrives, is possible when enough of us hold it in our vision, feel it in our hearts, lock arms together, do the work and

march forward into the light. We are one family, and this is our home. It is time for us to step up, rise up, and make our home the way WE, all the children of Earth, want it to be.

## **About the Author**

Victoria Reynolds is a Spiritual Luminary, Conscious Channel and Oracle of Freedom. Her role on the planet is to assist humanity in processing and breaking free from the controls of fear-based beliefs individually and collectively, in order to wake up, rise up and co-create a new reality based in love. To learn more about Victoria, visit [victoriareynolds.com](http://victoriareynolds.com).
